Intro to MyPowerHub

Key features/components

Key features/components

MyPowerHub brings together key student information from multiple PowerSchool tools, conveniently consolidated into one easy-to-access view. Effortlessly access grades, assignments, newsfeeds, two-way messaging, and more—all in a single, centralized hub. Key features of MyPowerHub are:

- **PowerTiles:** These dynamic tiles function as interactive hubs, bringing together data from a range of educational technology solutions into a single, convenient platform.

- **Two-Way Messaging:** Parents and students can now message teachers from MyPowerHub. Messaging can presently be translated into English, French, Spanish, Arabic, and Thai.

- **Centralized Location:** Find information on class schedules, grades, assignments, announcements, directory and more!

- **Access from Anywhere:** MyPowerHub is currently available through any web browser and is mobile-responsive, so can be easily viewed on a mobile phone or tablet as well.

MyPowerHub & ENR

MyPowerHub & ENR

- The MyPowerHub integration with PS ENR was officially released in [version 24.9.0.0](#) on September 6th, 2024

- ENR's form workflows for existing students are now integrated into MyPowerHub for the parent/guardian personas

- District admins can configure which ENR forms should be displayed as available forms to start within MyPowerHub
  - Those forms along with any in-progress and submitted forms are displayed in MyPowerHub through the context of the selected student

- Parents can search for forms, view form statuses, continue in-progress forms, view submitted forms, update submitted forms, and pay outstanding balances on submitted forms

PowerSchool

MyPowerHub & ENR (cont.)

- Parents are seamlessly authenticated into linked ENR accounts through a new SSO (single sign-on) process
  - As part of this new SSO process, PS SIS parent accounts that share access to the same student record in PS SIS also share that student within their ENR accounts, allowing these parents to collaborate on forms for the same student
- ENR's form workflows for new students and appointment, recommendation, checklist, and admission decision workflows are NOT currently integrated into MyPowerHub
- MyPowerHub does come at an additional cost – if your district hasn't already purchased MyPowerHub and is interested in doing so, please speak with your account manager
- Integration into MyPowerHub also requires some initial configuration by PS ENR Support
