UPDATE- Unified Insights 2023 Summer Dashboard Rollover Process

May 15, 2023

Hi «Tech_Contact1»,

This notification only covers your Unified Insights dashboards and does not impact the PowerSchool SIS end of year rollover.

Your rollover process of your Unified Insights dashboards is scheduled to automatically rollover your dashboards to Monday, 14th August 2023. The rollover process will reset all school year-based metrics to point the new 2023-2024 school year. Once the dashboard rollover process is complete your staff's view will default to the 2023-24 school year and student-based metrics will update once students have started back to school.

Some considerations for when you should rollover your dashboards are listed below:

- *If you have admin or teacher training and want all available metrics populated with data, you will want to rollover over after those scheduled training sessions are held.*
- *Once Unified Insights dashboards have been rolled over, the school year/YTD metrics will filter on the upcoming 2023-24 school year.*
- *Unified Insights dashboard rollover should happen prior to the start date for your students for the 2023-24 school year, if not, the standard content will still point to the 2022-23 SY.*

What do you need to do?

- **Option 1** – If you are satisfied with the NEW rollover date of Monday, 14th August 2023 for the Unified Insights rollover – *No action is required from you.*
- **Option 2** - If you want to change your Unified Insights rollover date on a different date to meet district needs - *Please send an email either your project manager or the Support team requesting a custom rollover date and the Unified Insights Product team will reschedule your rollover to occur on the data you specify.*

Thank you and please let us know if you have any additional questions regarding the rollover process.

Thank you and we hope you have a great start to the new school year!

Best wishes,

The Unified Insights Product Team
