

# PowerTest App for iPad Setup Instructions

## iPad Specifications

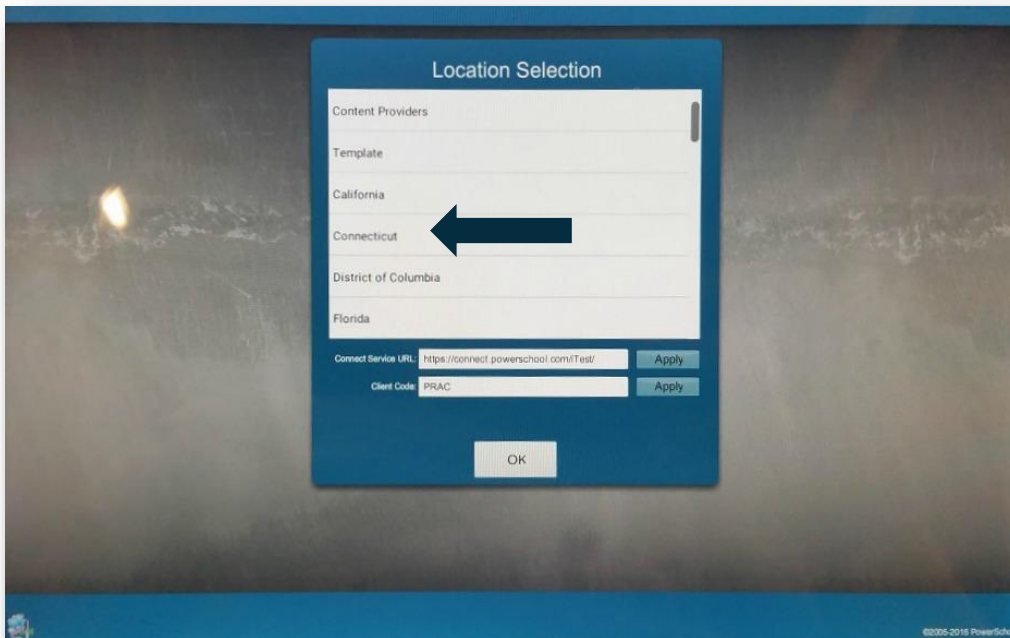

- iPad Generation 1 and higher with a minimum of iOS 4.3 or greater
- Minimum screen size: of 10.1" and
- Minimum screen resolution: 1280 x 800

## District Selection Instructions

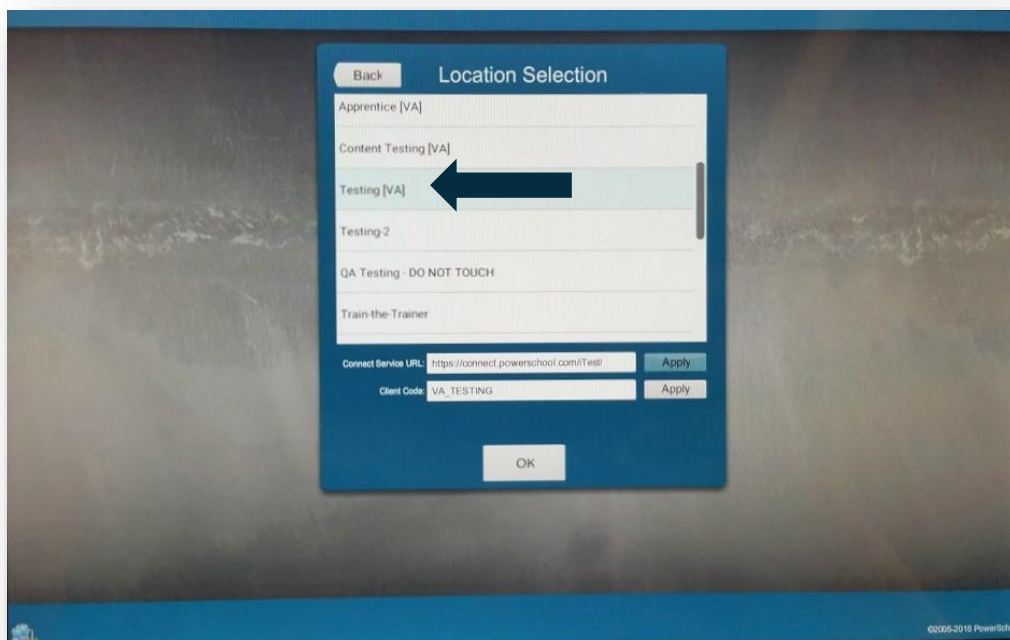

To install the app, open the App Store on the iPad and search for "PS PowerTest." The icon for the app is displayed below for reference when selecting the appropriate app to install.

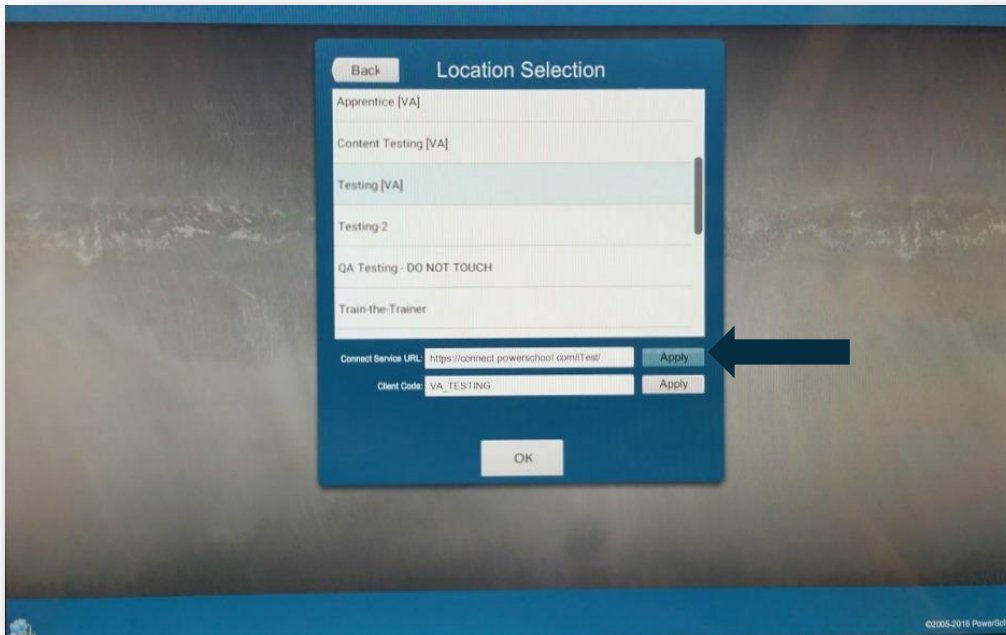

1. Once the PowerTest app has completed installation, open the app to begin the setup process.
2. A window will appear in the middle of the screen. Select the state in which the preferred district is located.

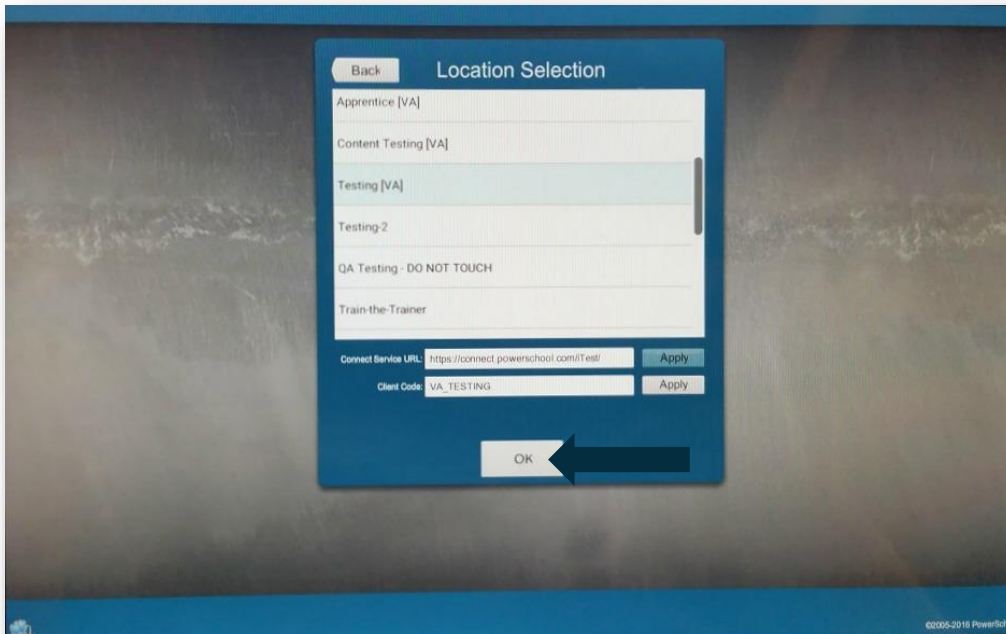

3. A list of districts within the selected state will appear. Select the desired district.

4. Click **"Apply"** to the right of **"Client Code"** to save the district code.

5. Click **"OK."**

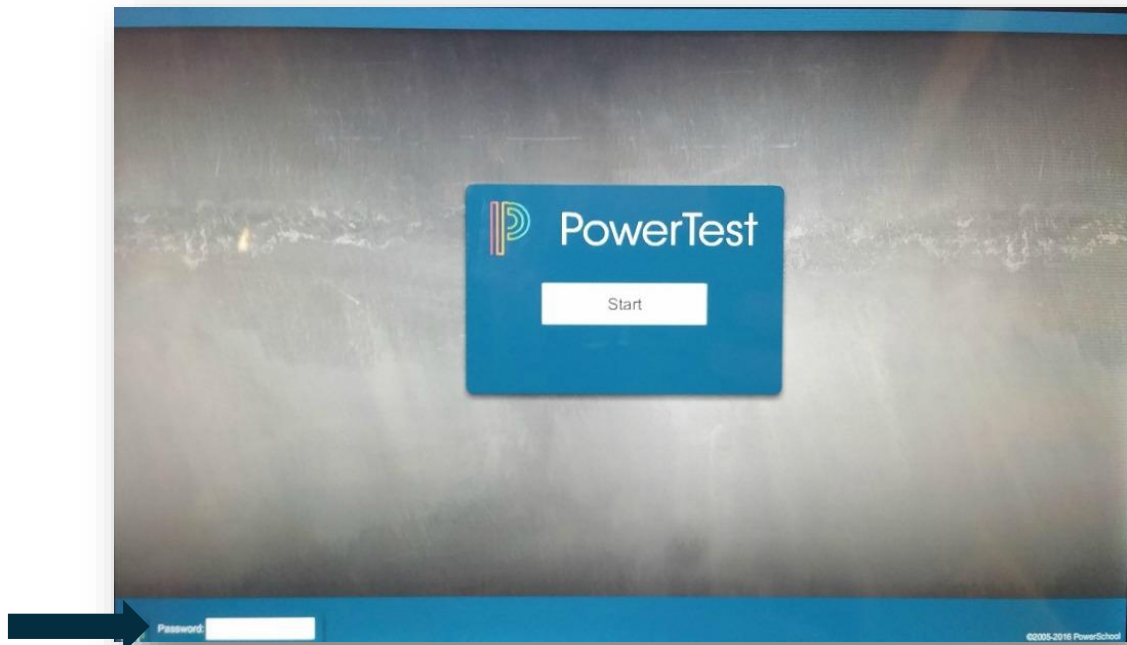

6. The preferred district has now been selected and students can begin testing.

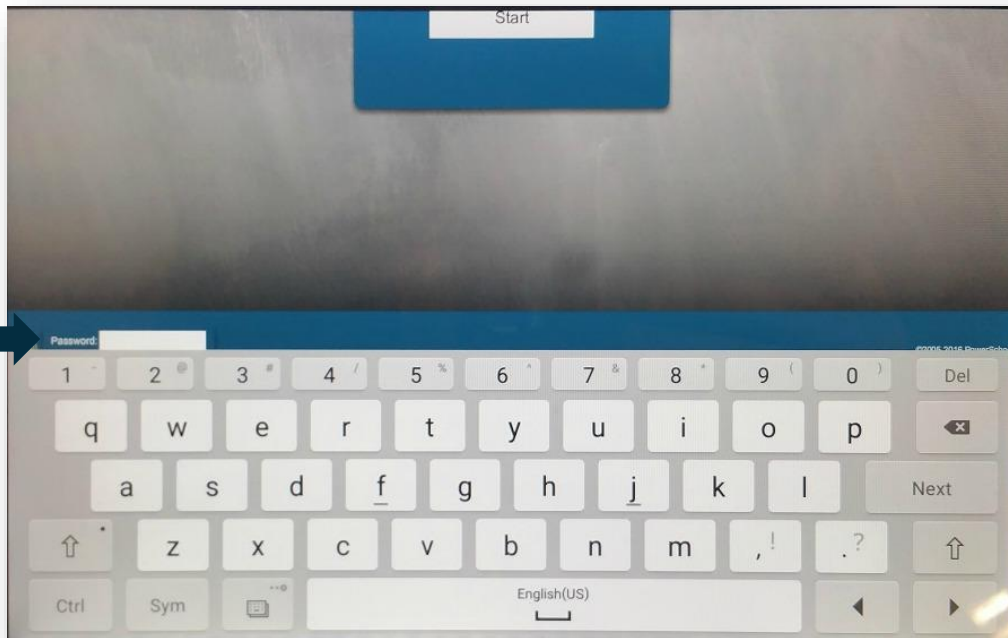

### Change Selected District Instructions

If the district needs to be changed, open PowerTest to display the “**Start**” screen.

1. Press and hold the computer connection icon in the bottom left corner of the PowerTest screen until a white text box appears.

2. Tap the white text box and type “help” and the day’s date backwards (i.e. for the 19<sup>th</sup> of the month, type “help91”) in the text box.

3. Click **Done** once the help login has been entered to display the diagnostic panel. Click **Settings** at the top left of the diagnostic panel to begin the district selection process outlined above.
