

PowerPack

POWERSCHOOL SIS PRODUCT BUNDLE

Subscribe to continuous innovation with PowerPack!

PowerPack is an extensive collection of valuable products for PowerSchool SIS. Developed and supported by dedicated PowerSchool experts, PowerPack is specifically designed to maximize your school or district's efficiency, power operations, and meet requirements with confidence.

Key Benefits of PowerPack

Low Cost

Save money **bundling** multiple products into a single subscription offering

Reliable

Products **developed and supported** by the PowerSchool Services team

Plug and Play Scaling

Easily enable or disable each product so you can **choose only what you need**

Continued Innovation

PowerSchool is constantly working to **further enhance** the offering

Led by some of the most innovative thinkers and experts at PowerSchool, the PowerPack team works hard to analyze customer requests and process gaps, then execute quickly to deliver growing value to you. **Our dedicated team delivers new components on a regular basis.** Subscribe now to PowerSchool SIS PowerPack and you will receive all of the following products, plus additional components added, at no additional cost:

Digital Document Delivery

Automatically split object report PDF's by student and email the attachment to contacts. Report cards, transcripts, form letters, and more can be split and sent.

Digital Document Signature

Collect signature acknowledgement from parents on documents with the click of a button. Simply enable a signature requirement on a Document Delivery job or send other important documents separately to recipients without the additional step of requiring them to log in.

Digital Document Management

Ensure long-term retention for documents and provide role-based access to document types. Parents can access documents that you grant access to. Easily send documents securely to requestors, including after graduation.

Flex Mailer

Give your administrative staff more flexibility when sending mass emails. No setup required - just choose the parents/guardians, add attachments, and let the system do the rest.

Early Warning System (EWS)

Tracks student grades, attendance, behavior, and credits toward graduation. Support students who are at risk of academic failure and to get them back on track.

Discipline Attendance Sync

Sync student attendance data based on disciplinary action (DET, ISS, OSS, EXP) taken against the student. Adds flexibility, saves time and improves data security.

Teacher Attendance

Hassle-free way for Administrators to manage their Teacher's and Substitute's attendance along with leave balances in PowerSchool.

Enhanced PowerLunch

Give your lunch office and parents the ability to enter lunch selections for the week, month, or year. Parents enter their choices into the public portal.

Hide Standard Percent

Give your schools the ability to hide the percent shown when users view a standard score's details.

Custom Alerts

A Student Alert Package that includes alerts for: 504, SPED, ELL, and IEP. Includes functionality to enable/disable alerts at the district level.

Utility Dashboard

Built specifically for PowerSchool and designed to help teachers carry out operations such as log entries. Access can be turned on or off by administration.

English Language Learners (ELL)

Collects required Federal and State government information pertaining to ELL students including Enrollment Gap, Parent Request Placement, and more.

Locker Management

Keep track of locker combinations and groups, easily assign lockers to groups of students en masse, and import/export locker information.

Web-Based Reports

1 course-based report card, 1 standards-based report card, and 1 transcript that are all flexible enough to fit the needs of districts, including custom logo upload.

The PowerPack team is constantly reviewing enhancement requests and identifying new components to include in PowerSchool SIS PowerPack. Subscribe to the PowerPack newsletter through PowerSchool Community to stay informed of our latest innovations!
